

## Cloud Activity

### Lesson: Weather

### Materials Needed:

- Cotton Balls
- Paper
- Glue
- Markers

### Steps:

- Teach students about each of the different types of clouds and their physical make-up
- Provide materials to students to create a booklet or flip book representation of the different types of clouds
- Have each student to fold their paper in half lengthwise and cut 4 equal tabs
- Have students form clouds of their own using cotton balls and glue—manipulating the cotton ball to resemble each cloud type and pasting a different type of cloud on each tab.
- Have students label each type of cloud—one per tab.
